

A lovely surprise for Editor Kenny, as she arrived in Coventry recently for a meeting with Chairman Tom and PR Meg. She was collected from Coventry Station by member John Taylor and taken for a sunny drive to nearby Coombe Abbey in John's 1926 vintage Singer 10-26 car.

*As John pointed out, a car celebrating its 90th Birthday this year with The Queen.*

John has travelled extensively all over Europe in his Singer, including to the historic town of Arnhem in the Netherlands. He takes the car out for a run most weeks and is currently planning yet another long trip. He calls it George, in homage to the owner of the factory George Singer.

John Taylor became involved with the DPS through meeting member John Miller in the 1990's. John was a frequent visitor to Wellesbourne Airfield and to vintage sports car club events. As both of them were avid vintage car and aviation enthusiasts, they inevitably soon started talking to each other about their common interests.

On discovering that John Miller was an avid collector of cameras on behalf of the DPS, John Taylor volunteered his services to assist using his local contacts. Having already collected hundreds of cameras for the DPS, John Taylor found himself struggling with arthritis and subsequently joined the DPS in his own right. Since John Miller's untimely death, John Taylor has continued working with our Chairman, collecting cameras, books and equipment for the DPS and helping on our stand at the NEC each year too.
